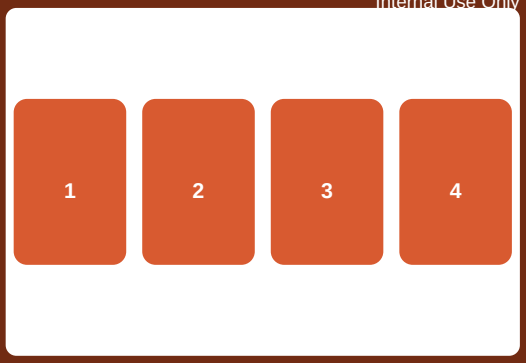
PEOPLE & CI

Internal Use Only

Brainstorming

Generate a large quantity of creative ideas in a structured, judgment-free group session to expand the solution or



WHEN TO USE

When looking for creative solutions; at the start of problem solving or improvement planning before narrowing options.

HOW TO APPLY — STEPS

1. Define the question or challenge clearly and specifically in advance — before people arrive
2. Set and enforce the rule: no evaluation, no criticism, no 'yes, but' during idea generation
3. Generate ideas in silence individually for 3–5 minutes before sharing with the group
4. Capture all ideas visibly; cluster related ideas into themes
5. Vote or use criteria to shortlist the top candidates for further development

PRACTITIONER TIP

! Quantity before quality every time. The best ideas in a session almost always emerge after you have already generated 30 others.

KEY OUTPUTS

- Full idea list (no filtering during generation)
- Clustered themes and patterns
- Shortlist of top ideas for development

HOW TO MEASURE SUCCESS

Ideas generated per session; % of ideas advanced to action; quality of selected ideas rated at 90-day outcome review
