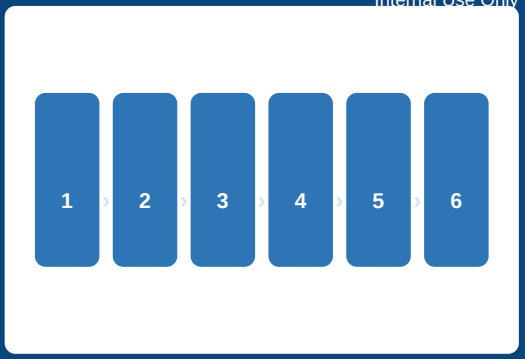
MANAGEMENT SYSTEMS

Daily Meeting Management

Standardise the daily team meeting so it is short, standing, visual, and generates real actions — the heartbeat of the



WHEN TO USE

Every day, same time, same place. The daily meeting is a non-negotiable team habit — not a scheduled event that can be cancelled when things get busy.

HOW TO APPLY — STEPS

1. Fix the time, location, and duration (target: 15 minutes maximum) — same every day
2. Define a fixed agenda: Safety → Yesterday's KPI → Today's plan → Issues → Recognition
3. Use a visual board: post data before the meeting — no reading from laptops during the standup
4. Capture every issue and action in a log with an owner and due date before the meeting ends
5. Review open actions from the previous meeting — close out or escalate overdue items
6. Score meeting quality weekly — post results visibly and act on low-scoring criteria

PRACTITIONER TIP

! If the team cannot meet for 15 minutes every day, the real problem is not time — it is prioritisation. The daily meeting is the single highest-ROI investment a team leader can make.

KEY OUTPUTS

- Standard daily agenda (fixed — never changes)
- Completed action log with owner and due date per issue
- Visual board update record
- Weekly meeting quality audit score
- Monthly completion rate and issue resolution time

HOW TO MEASURE SUCCESS

Meeting compliance rate %; Actions generated per meeting; Actions closed before next meeting %; Average issue resolution time in days
