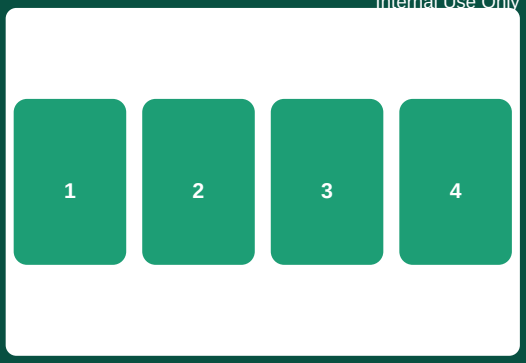
QUALITY & PROCESS

Internal Use Only

Kaizen Event Report

Document a structured 3–5 day focused improvement event from objectives set on Day 1 through to results measured on



WHEN TO USE

During and immediately after every Kaizen event. The report is a living document — started on Day 1 and completed before the team disperses on Day 5.

HOW TO APPLY — STEPS

1. Day 1: Document event objectives, team, scope, and current state baseline data
2. Day 2: Record gemba observations, root cause analysis findings, and waste identified
3. Day 3–4: Capture every improvement implemented during the event with photos
4. Day 4–5: Measure before vs after results using the same metrics as the baseline
5. Confirm which standards and work instructions have been updated
6. Agree sustain audit schedule — 30, 60, and 90-day check dates with named auditors
7. Document open actions with owners and due dates (maximum 10 items, max 30 days)
8. Record lessons learned and propose the next Kaizen event area

PRACTITIONER TIP

! If results are not measured on Day 4, they will never be measured. Never leave the event without an agreed sustain audit date in the calendar and a named auditor.

KEY OUTPUTS

- Completed Kaizen event report with before/after data
- Photo evidence of changes made during the event
- Updated standards and work instructions list
- Sustain audit schedule (30/60/90 days) with owners
- Open actions log with owners and due dates

HOW TO MEASURE SUCCESS

% of targets achieved vs Day 1 goals; Sustained at 30-day audit Y/N; Open actions closed within 30 days %; Sustain audit compliance rate
