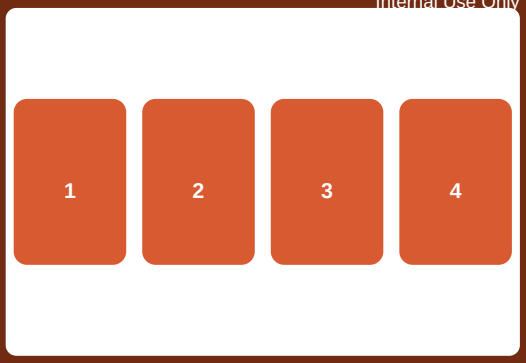
Internal Use Only

NLC Principles

Apply Natural Leadership Capability principles to develop leaders who enable people to think and perform at their best.



WHEN TO USE

When building leadership development programmes; when team engagement, initiative, or empowerment is consistently low.

HOW TO APPLY — STEPS

1. Assess current leadership behaviours against the NLC capability model
2. Define a target leadership profile relevant to the organisation's context
3. Build an individual development plan for each leader based on the gap
4. Coach leaders using real workplace situations — not classroom exercises alone
5. Measure team outcomes as the primary indicator of leadership effectiveness

PRACTITIONER TIP

! NLC is about what a leader enables in others, not what the leader personally does. Measure the team, not the leader's activity.

KEY OUTPUTS

- Leadership capability assessment
- Individual development plan per leader
- Coaching interaction log
- Team outcome metrics (engagement, initiative, quality)

HOW TO MEASURE SUCCESS

Team engagement score; decisions made successfully below management level; employee-initiated improvement rate
