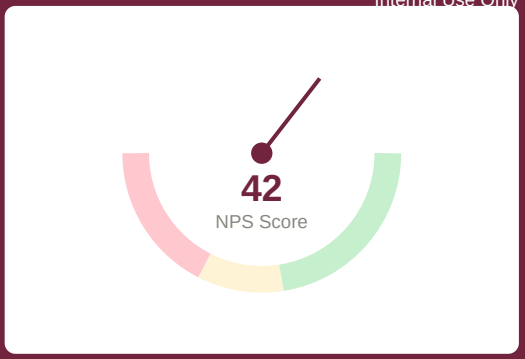
Internal Use Only

NPS / Survey Tools

Measure customer loyalty and satisfaction using standardised surveys to generate quantitative data for tracking and



WHEN TO USE

Continuously or at defined moments in the customer journey: post-purchase, post-support interaction, or annual relationship review.

HOW TO APPLY — STEPS

1. Select the right survey type for the moment — NPS for loyalty, CSAT for interaction, CES for effort
2. Design short, unambiguous questions — maximum 3 questions per touchpoint
3. Distribute at the right moment in the customer journey — not as an afterthought
4. Analyse overall score AND verbatim comments for themes — the score is a number, the comments contain the insight
5. Act on findings within 30 days and close the loop personally with detractors where possible

PRACTITIONER TIP

! NPS alone tells you almost nothing. The follow-up question 'Why did you give that score?' contains all the actionable information.

KEY OUTPUTS

- NPS, CSAT, or CES score by segment and period
- Verbatim theme analysis report
- Action plan by theme with owners and deadlines

HOW TO MEASURE SUCCESS

NPS trend over rolling 12 months; survey response rate %; score by customer segment; improvement actions closed per quarter
